

IT Consultant (Permanent Contract)

Diginus Consulting S.A. is a young Luxembourgish consulting company which is specialized in the construction and industrial sector. Diginus Consulting is looking for new talents to join the team and to guide our clients throughout their digital transformation as well as process optimization.

Key responsibilities

- Consult on process analysis and digitalization
- Implement digital solutions based on the client's needs
- Train and coach key-users within the application
- Guide and assist clients throughout their data migrations and specific workflows and report developments
- Manage entire projects, including the quality assurance and budget monitoring

We offer

- Experience a start-up environment within a young and dynamic team
- Involve in diverse projects in Luxembourg and around Europe
- Have the opportunity to discover and work with companies from various sectors
- Fast and beneficial learning process within the subject of digitalization
- Responsibility and independence while managing projects

Your profile

- Master's or Bachelor's degree in computer science, information technology, software engineering or a related field
- Deep proficiency in SQL (SQL Database, SQL Script, SQL Data Migration) and JavaScript
- Knowledge of IT Server Management is considered a plus
- Proficiency in English and German, both verbal and written (Luxembourgish and/or French is considered a plus)
- Interested in IT applications, eager to learn, good problem-solving and communication skills
